Environmental Policy

Environmental Policy

- Minimize the project's total energy consumption.
- Minimize the number of journeys by using co-transport, travel by public transport and by train.
- The food served during the Lava Project will be sustainably produced and, to the extent possible, organic and locally produced.
- Minimize unnecessary use of paper before and during the fair by encouraging exhibitors to digitize all their company information and use QR codes or the like.
- Minimize the use of disposable products and other products with a short life cycle. Lava encourages exhibitors to minimize their use of these products during the fair day.
- Minimize environmentally hazardous substances, emissions of chemicals and choose eco-labeled alternatives as far as possible.
- Maintain high environmental requirements for the project's partners and suppliers and, as far as possible, use environmentally conscious printing companies and transport companies.
- Lava chooses to use environmentally friendly products made from materials that can be recycled and / or created from recycled materials.
- Lava recycles and sorts its waste.
- After the fair, the results of the project's environmental work are compiled and evaluated, in order to enable development within the environmental work for next year's Lava.
- Lava is clear about its environmental work and the importance of this work. This must be communicated to those involved in the project, exhibitors, partners and visitors to the fair.
